

Treatments for skin conditions

Many skin conditions are no longer treated on the NHS, and your GP will not routinely refer you for:

Sebaceous
Cysts

Warts &
Verrucas

Skin Tags

Benign Moles
& Dermal
Naevi

Rough-Surfaced
Raised
Lesions

Raised or Keloid
Scars

At Vita Health Group, we offer private cosmetic mole removal with our qualified clinicians and surgeons.

This includes treatment of warts, cysts, and skin tags through minor surgery (excision) and freezing therapy. Our services are designed to provide you with peace of mind and exceptional results.

Please note that there are many private providers offering benign lesion removal. It's recommended that you research clinics thoroughly to confirm the clinic is reputable through reading reviews, checking credentials, and the medical staff's qualifications.

Why Choose Us?

- **Qualified Professionals:** Our team of experienced dermatologists and medical experts are dedicated to delivering the highest quality care.
- **Comprehensive Services:** Whether you need mole removal or treatment for warts, cysts, or skin tags, we offer a range of options including excision and freezing therapy.
- **Easy Access:** Convenient appointment scheduling and accessible clinic locations make it simple to get the care you need when you need it.
- **CQC Registered:** Our clinic meets the highest standards of care and safety, and we are registered with the Care Quality Commission (CQC).
- **Personalised Treatment Plans:** Every patient is unique. We tailor our treatment plans to meet your specific needs and ensure the best possible outcome.
